- Developed essential skills like discipline, punctuality, communication, leadership, and collaboration while gaining experience in volunteering and handling people.

PROJECTS

PokemonInsight | ReactJS, JavaScript, HTML, CSS

- An interactive Pokémon website using React that dynamically fetches and displays data from a public Pokémon API. The website allows users to explore detailed information about various Pokémon, including stats, abilities, and images.

IWAS – Intelligent Workforce Allocation System | Java, Spring Boot, HTML, CSS, JavaScript

- Designed and developed a smart workforce management system to allocate employees to projects based on skill matching.
- Implemented features to manage employee leave requests and project assignments, ensuring optimal resource utilization.
- Built using Java and Spring Boot for the backend with a responsive frontend using HTML, CSS, and JavaScript.
